

MCQs: *Understanding Data* (Chapter 7)

1. Data are crucial mainly because they help in

- (A) Entertainment
- (B) Decision making
- (C) Storage only
- (D) Decoration
- (E) None of the above

Answer: (B)

2. Census data are mainly collected to

- (A) Increase population
- (B) Conduct elections
- (C) Plan and formulate policies
- (D) Enter data in computers
- (E) None of the above

Answer: (C)

3. The singular form of data is

- (A) Datas
- (B) Dated
- (C) Datum
- (D) Datae
- (E) None of the above

Answer: (C)

4. Which of the following led to generation of large volume of data at a fast pace?

- (A) Printing press
- (B) ICT revolution
- (C) Manual records
- (D) Census
- (E) None of the above

Answer: (B)

5. Which of the following is NOT an example of data?

- (A) Online posts
- (B) Sensor signals
- (C) Knowledge

- (D) Images
- (E) Videos

Answer: (C)

6. Data stored in rows and columns is called

- (A) Raw data
- (B) Unstructured data
- (C) Metadata
- (D) Structured data
- (E) None of the above

Answer: (D)

7. In structured data, each column represents

- (A) Observation
- (B) File
- (C) Attribute/Variable
- (D) Database
- (E) None of the above

Answer: (C)

8. Which of the following is an example of structured data?

- (A) Newspaper
- (B) Email content
- (C) Inventory table of a shop
- (D) Social media post
- (E) None of the above

Answer: (C)

9. Data which does not follow row-column format is called

- (A) Structured
- (B) Tabular
- (C) Statistical
- (D) Unstructured
- (E) None of the above

Answer: (D)

10. Which of the following is unstructured data?

- (A) Student result table
- (B) ATM transaction record
- (C) Web page with text and images
- (D) Spreadsheet
- (E) None of the above

Answer: (C)

11. Metadata means

- (A) Large data
- (B) Processed data
- (C) Data about data
- (D) Encrypted data
- (E) None of the above

Answer: (C)

12. Image size, image type and resolution are examples of

- (A) Raw data
- (B) Structured data
- (C) Metadata
- (D) Information
- (E) None of the above

Answer: (C)

13. The first step before data processing is

- (A) Analysis
- (B) Storage
- (C) Collection
- (D) Deletion
- (E) None of the above

Answer: (C)

14. CSV stands for

- (A) Central Storage Value
- (B) Common Separated Values
- (C) Comma Separated Values
- (D) Computer Stored Values
- (E) None of the above

Answer: (C)

15. Which software system overcomes limitations of file processing?

- (A) Spreadsheet
- (B) DBMS
- (C) Compiler
- (D) Operating System
- (E) None of the above

Answer: (B)

16. Which of the following is NOT a storage device?

- (A) HDD
- (B) SSD
- (C) Pen Drive
- (D) RAM Processor
- (E) None of the above

Answer: (D)

17. The process of storing data for future use is called

- (A) Data analysis
- (B) Data mining
- (C) Data storage
- (D) Data classification
- (E) None of the above

Answer: (C)

18. The Data Processing Cycle includes

- (A) Input only
- (B) Output only
- (C) Input, Processing and Output
- (D) Storage only
- (E) None of the above

Answer: (C)

19. Mean is also known as

- (A) Middle value
- (B) Most frequent value
- (C) Average

- (D) Range
- (E) None of the above

Answer: (C)

20. Mean is NOT suitable when data contains

- (A) Small values
- (B) Large values
- (C) Outliers
- (D) Equal values
- (E) None of the above

Answer: (C)

21. Median is the

- (A) Average value
- (B) Most frequent value
- (C) Middle value after sorting
- (D) Difference of values
- (E) None of the above

Answer: (C)

22. Mode is the value which

- (A) Lies in the middle
- (B) Appears most frequently
- (C) Is the largest
- (D) Is the smallest
- (E) None of the above

Answer: (B)

23. Which measure can be used for non-numeric data?

- (A) Mean
- (B) Median
- (C) Mode
- (D) Range
- (E) None of the above

Answer: (C)

24. Range is calculated as

- (A) Mean – Median
- (B) Maximum – Minimum
- (C) Mode – Mean
- (D) Sum ÷ Total values
- (E) None of the above

Answer: (B)

25. Which statistical measure is most affected by outliers?

- (A) Median
- (B) Mode
- (C) Mean
- (D) None
- (E) All of the above

Answer: (C)

26. Standard deviation measures

- (A) Central value
- (B) Frequency
- (C) Spread of data
- (D) Maximum value
- (E) None of the above

Answer: (C)

27. Smaller standard deviation indicates

- (A) More variation
- (B) Less spread
- (C) Incorrect data
- (D) More outliers
- (E) None of the above

Answer: (B)

28. Which technique is best to find salary disparity?

- (A) Mean
- (B) Median
- (C) Mode
- (D) Standard Deviation
- (E) None of the above

Answer: (D)

29. Popular colour of cars can be identified using

- (A) Mean
- (B) Median
- (C) Mode
- (D) Range
- (E) None of the above

Answer: (C)

30. Which language is mentioned for data processing and analysis?

- (A) Java
- (B) C++
- (C) Python
- (D) HTML
- (E) None of the above

Answer: (C)
